PROFILE SUMMARY

MCA graduate and freelance full stack developer with live sites delivered for real businesses — a wellness storefront with a dealer portal, an IT institute's site, and a two-wheeler parts catalogue of roughly 3,000 SKUs. React and Next.js on the front, Node and Express behind, MongoDB or MySQL underneath, deployed on Vercel and GitHub Pages.

FREELANCE PROJECTS

EMAS Organic — Wellness Storefront & Dealer Portal

2026

Technologies: React, Vite, Tailwind CSS, React Router

- Built one site serving two audiences — retail shoppers and a dealer network — by splitting the routes so neither buries the other.
- Component-driven: hero slider, category and product grids, dealer packages. Deployed to GitHub Pages at no hosting cost to the client.

SDS Technologies — IT Services & Training Institute

2026

Technologies: React, Vite, Three.js, Tailwind CSS

- Restructured the site around three visitor intents — hire, learn, apply — each with its own track and call to action instead of one shared form.
- Built a real-time 3D hero in Three.js, and pinned WhatsApp to every screen — the channel local clients actually use.

Thirumalai Autospare World — Two-Wheeler Parts Catalogue

2026

Technologies: HTML5, CSS3, JavaScript

- Modelled part fitment as rules rather than a fixed list — 70 templates across 57 bike models generating roughly 3,060 accurate SKUs.
- Customers search by naming their bike, not a part number: brand to model to fitting parts in three clicks. Zero dependencies.

INTERNSHIP

Smart Subscription & Payment Management System — DigiSquare

2025

Technologies: React.js, Node.js, Express.js, MySQL, Razorpay

- Developed a full-stack application for managing subscriptions and automating payment processing through Razorpay.
- Built the interfaces in React.js and the APIs in Node.js and Express.js, designed the MySQL schema, and integrated real-time invoice generation.

EDUCATION

Master of Computer Applications

2023 – 2025 · CGPA 6.5 / 10

Bharathiar University, Coimbatore

Bachelor of Science

2020 – 2023 · CGPA 7.04 / 10

Arulmigu Palaniandavar College of Arts and Culture, Palani

TECHNICAL SKILLS

Frontend	HTML5, CSS3, JavaScript, React.js, Next.js, Tailwind CSS
Backend	Node.js, Express.js, REST APIs
Database	MongoDB, MySQL, SQL (Oracle SQL knowledge)
Tools	Git & GitHub, Vite, Vercel, Figma, Power BI, Microsoft Excel
Also	DaVinci Resolve, Canva (video and design work)

CERTIFICATIONS

- Power BI — Coursera, 2024
- Big Data Computing — NPTEL, 2023
