PROFILE

MCA graduate and freelance full stack developer with live sites delivered for real businesses — a wellness storefront with a dealer portal, an IT institute's site, and a two-wheeler parts catalogue of roughly 3,000 SKUs. React and Next.js on the front, Node and Express behind, MongoDB or MySQL underneath, deployed on Vercel and GitHub Pages.

FREELANCE PROJECTS

2026

EMAS Organic

Wellness Storefront & Dealer Portal

Built one site serving two audiences — retail shoppers and a dealer network — by splitting the routes so neither buries the other. Component-driven build deployed to GitHub Pages, so the client carries no hosting cost.

2026

SDS Technologies

IT Services & Training Institute

Restructured the site around three visitor intents — hire, learn, apply — each with its own track and call to action instead of one shared form. Built a real-time 3D hero, and pinned WhatsApp to every screen, the channel local clients actually use.

2026

Thirumalai Autospare

Two-Wheeler Parts Catalogue

Modelled part fitment as rules rather than a fixed list — 70 templates across 57 bike models generating roughly 3,060 accurate SKUs. Customers search by naming their bike, not a part number: brand to model to fitting parts in three clicks.

INTERNSHIP

2025

DigiSquare

Smart Subscription & Payment Management System

Developed a full-stack application for managing subscriptions and automating payment processing through Razorpay. Built the interfaces in React.js and the APIs in Node.js and Express.js, designed the MySQL schema, and integrated real-time invoice generation.
